

Fuel Cycle Integration

***GRNS Meeting: Washington, D.C.
October 2, 2001***

Status / Issues

- ***FCCG Report Scheduled for Sep 28:***
 - ***Major passages have been drafted***
 - ***Final expected mid-October***
 - ***Analysis is done for 4 idealized cycles***
 - ***Major Conclusions are completed***
-
- ***Not yet integrated into the TWG Concept Reports***
 - ***Symbiotic alternatives should be considered***
 - ***Thorium cycle should be studied***

Proposed Path Forward

- ***Integration of FCCG results into TWG reports***
 - ***TWGs refine concept sets, where appropriate***
 - ***TWGs apply the consistent evaluations in the FCCG report in the areas of Sustainability, and selected others***

- ***FCCG will continue, with limited scope***
 - ***Decide on additional fuel cycles and system alternatives in October 2001, via a two-day meeting of the TWG and FCCG leaders***
 - ***Evaluate specific cycles for the more promising concepts***
 - ***Review results with TWG and FCCG leaders in December***
 - ***Evaluate symbiotic fuel cycles***
 - ***Review results with TWG and FCCG leaders in February***
 - ***Wrap-up report by March 2002***
